Good evening,

I am just reaching out to see if the council may be able to support with some room space in Colne for us to provide vital services for clients with substance misuse issues. We have been working out of Colne Health Centre for a while and the demand for our service is increasing and they cannot accommodate us with further space and time in the building. I was wondering if this is something you could support with or make any suggestions about public buildings that we could utilise? We have excellent recovery programmes and people do get well, but we need the support of partner agencies to enable us to work effectively in the locality.

I would be very grateful if you could consider this.

Thank you

Kind regards

**Alison Ashcroft**
