

Capital Investment Project Consultation

Colne Town Council wishes to seek approval to borrow £230,000 from the Public Works Loan Board to help fund three projects that will secure future income streams for the Town Council.

Project 1 – Ground Floor Shop

The shop at No. 2 Albert Road has been vacant for some time and the shop front is in a poor state of repair – This needs to be rectified as soon as possible.

Project 2 – Upgrade to the Town Hall Heating System

The Town Hall boilers are highly inefficient and are on their last legs. Investment in this area will lead to efficiency savings which can be used to help fund our services.

Project 3 – First Floor Living Accommodation

Converting unutilised office space into first floor living accommodation will not only save on utility bills and business rates but will provide an additional income stream to assist in the provision of future services for the town.
