

Item 15 – Aug FC

Funding and Support for Community Energy Projects

Dear All,

I spotted this link in the LALC newsletter that could be of interest to community groups and town and parish councils who are considering small scale energy generation: <https://communityenergygo.org.uk/eligibility-criteria/>

I feel that we have lots of opportunity to explore projects on the numerous small patches of land that many bodies own locally and we certainly tick many of the boxes in terms of deprivation and diversity. With the PBC asset transfer underway, I think we should be looking at these land patches and considering whether any of them are suitable for energy generation - we might be able to generate some much needed income!

Something to consider for future agendas?
